

NAUFAL FIKRI

JUNIOR WEB DEVELOPER | JUNIOR FULL STACK DEVELOPER

Cibinong, Bogor, West Java, Indonesia | +62 877-7386-2920 | naufalfik777@gmail.com | linkedin.com/in/naufal-fikri-0500r | github.com/opangganteng

SUMMARY

Informatics Engineering graduate with hands-on experience building 4 full-stack, database-driven web applications using PHP Native, Laravel, C# ASP.NET MVC, and Next.js/Express.js. Skilled in designing MVC architecture, relational databases, and CRUD features from the ground up. Backed by IT Support experience that sharpened troubleshooting and problem-solving skills. Fast learner, detail-oriented, and comfortable working independently or in a team.

TECHNICAL SKILLS

Programming Languages	PHP, C#, JavaScript, SQL
Frameworks & Libraries	Laravel, ASP.NET MVC, Next.js, Express.js
Databases	MySQL, PostgreSQL, SQL Server, Dapper (ORM)
Front-End	HTML5, CSS3, JavaScript, Responsive Design
Concepts & Architecture	MVC, RESTful principles, CRUD, Relational DB Design
Tools & Other	Git, Troubleshooting, Network & System Support

WEB DEVELOPMENT EXPERIENCE

Full Stack Developer — Kelurahan Cibubur Information Website

Next.js · Express.js · PostgreSQL

- Built a full-stack village information website, covering both the front-end (Next.js) and back-end (Express.js), fully integrated end to end.
- Designed a PostgreSQL database schema to store and manage dynamic resident-service content.
- Implemented a responsive layout for consistent access across desktop and mobile devices.
- Structured the application in a modular way to support easier maintenance and future development.

Full Stack Developer (Independent Project) — School Management System

C# · ASP.NET MVC · Dapper · SQL Server

- Developed a school data management system using MVC architecture to separate business logic, views, and data.
- Built CRUD functionality for school master data using Dapper as the data-access layer to SQL Server.
- Designed a relational data schema to support efficient, well-structured school information management.

PHP Developer (Independent Project) — E-Piket: School Duty Management System

PHP Native · MySQL · HTML5 · CSS3 · JavaScript

- Built a school duty-management system from scratch using native PHP, covering 5+ CRUD modules (teachers, students, classes, rooms, academic years).
- Developed duty-scheduling, attendance-recording, and student absence/lateness-logging features.
- Built an admin dashboard for real-time monitoring of all school duty activities.
- Designed the MySQL relational database that powers all application features.

Full Stack Developer (Independent Project) — JeWePe Building Materials Store

PHP · Laravel · MySQL

- Built a product and inventory management system for a building-materials store using the Laravel framework.
- Developed database-driven CRUD features to support daily store operations.
- Applied Laravel's MVC structure to separate application logic from data processing.

ADDITIONAL WORK EXPERIENCE

IT Support — Jagat Satwa Nusantara, TMII

- Provided technical support for hardware, software, and network issues, including CCTV system maintenance.

- Handled technical support requests and ticketing processes to maintain system reliability.

IT Support — SMK Wijaya Kusuma

- Installed, configured, and updated operating systems and applications to maintain system stability.
- Maintained IT asset documentation and system configurations on an ongoing basis.

QC Field — PT Serena Indopangan

- Conducted on-site quality control inspections to ensure products met company standards.

EDUCATION

Bachelor's Degree in Informatics Engineering — Gunadarma University

Focus areas: Web Application Development, Database Systems, Software Engineering, and IT Support.

CERTIFICATIONS

- JavaScript Programming Fundamental
- Building Website Using HTML5
- Basic Web App Design
- SQL Server for Beginner
- WAN Cisco Router — Intermediate
- LAN Cisco Router

LANGUAGES

Indonesian — Native | English — Basic/Intermediate
